PROJECT EXPERIENCE

Project Name	: Cozy Haven Stay Hotel Booking System
Role	: Team Member
Environment	: Windows 10
Technology	: MySQL, Core Java, React JS
Duration	: August 2024 to October 2024
Tools Used	: VS Code, Spring Tool Suite

Description: Collaborated with a team of two to develop the Cozy Haven Stay Hotel Booking System. Customers are able to search for and book rooms according to their preferences. Hotel owners can add hotels and rooms, while the admin has control over managing bookings, and can delete owners and customers as needed.

Roles and Responsibilities:

- Setting up the MySQL database tables.

- Being a team player and taking the accountability of work

- Developing the view layer for them in React JS.

- Integrating the developed modules with other functionalities of the application.

- Attended sprint meetings and presented detailed status reports.

Project Name	: Project Management System
Role	: Team Member
Environment	: Windows 10
Technology	: Core JAVA & Java Testing using Junit test cases
Duration	: April 2024 to May 2024
Tools Used	: Spring Tool Suite

Description: I worked on a Project Management System with functionalities to streamline team and task coordination. Key features included: Adding employees, projects, and tasks. Assigning projects to employees and assigning tasks within projects to specific employees. employees and tasks as needed. Listing all projects along with associated tasks assigned to each employee.

Roles and Responsibilities:

- Developed test cases

- Reached 80%line coverage for the Backend functionalities.

- Attended project meetings and presented detailed status reports.
